

## BEACHES OF ST. BARTHS

### **SHELL BEACH**

Walking distance to/from the center of Gustavia. This beach is mostly made up of beautiful shells! This is a fabulous beach to enjoy lunch at the famous Shellona Restaurant (lunch only). Or, enjoy the sunset with a bottle of rosé.

### **COLOMBIER**

One of the most remote beaches as it is accessible only by boat or by various hiking trails (about 30 minutes). It is worth the visit! We highly recommend hiking from Petite Anse beach because you are sure to run into a few mountain goats with their babies! Sam and Chris are happy to provide detailed directions as it can be a little tricky to find the start of this hike. If you look very carefully in this photo, you will see Chris taking a dip in the ocean!

### **SALINE**

A short walk along a sandy path will take you directly to the middle of one of the most gorgeous beaches in the world. Families please be aware that it is also a popular spot for nude sun-bathing.

### **GOUVERNEUR**

Gouverneur Beach is one of the easiest to access as it has plenty of parking and is only minutes from Gustavia. A favorite for sunbathers.

## BEACHES OF ST. BARTHS

### SAINT JEAN

Probably the most visited beach in St Barth and the location of the party Saturday night. Saint Jean Beach has something for everyone. Whether you stop at one of the several beach restaurants or want to take advantage of some water sports - it is one of the most active beaches. This is also an amazing location to view planes taking off and landing.

### LORIENT

Lorient Beach has always been popular with surfers. Small pools have been built naturally by coral reefs and are ideal for young children.

### GRAND-CUL-DE-SAC

The Lagoon of Grand-cul-de-Sac is an ideal place for any number of water activities. A favorite of kite surfers, jet ski and kayakers.

### PETIT-CUL-DE-SAC

The entrance to the path of the natural pools begins on this beach! It is ideal for sunbathing or to admire the turtles who adore the marine herbarium of this bay.
